## PROFILE

Highly motivated and results-driven WordPress Developer with a passion for creating reliable, efficient, and user-focused web solutions. I have hands-on experience in building responsive and SEO-friendly websites using WordPress, HTML5, CSS3, JavaScript, and PHP. My goal is to enhance digital experiences through clean code, design precision, and effective SEO strategies.

## PROJECTS

### ○ Ecommerce Website

A WordPress e-commerce project designed to sell a wide variety of spices, featuring a custom-built, user-friendly interface.

It includes product galleries, a secure shopping cart system, and an integrated blog for sharing recipes and spice information.

The site was built to be fully responsive, ensuring a seamless Browse experience on any device.

### ○ School Website

This school website is built on WordPress using a School Management Plugin to centralize all operations.

Admins and teachers manage content, users, grades, and attendance from the backend.

Parents and students use a secure portal to view academic data, pay fees, and track applications.

### ○ Online Bus Booking Website

This online platform facilitates real-time bus ticket booking for various routes.

Customers can search for trips, select seats from an interactive layout, and pay securely online.

Administrators use a dashboard to manage routes, pricing, buses, and view all booking reports.
